INTERIOR

TENSION FABRIC FRAMES  
WITH A SYSTEM

# AMBIANCE INDIVIDUALITY BRIGHTNESS

**FOR YOUR LIVING SPACES**

Your home is a very special place. A place of retreat created to meet your wishes and needs. Our tension fabric frames play an active role in creating an atmosphere of comfort and well-being. Add real highlights with our illuminated OCTAlumina series featuring shadow-free illumination and high-performance power LEDs. Or opt for our special fabric that almost magically produces radiant arcs of light in the depths of the room.

## TENSION FABRIC FRAMES

And it is not just the color brilliance that is convincing, but also the flexibility. Thanks to their modular concept and equipped with fabrics that can be replaced with new motifs in the blink of an eye, our tension fabric frames offer the perfect solution for every space requirement. If you are you looking for the ideal system to give your living spaces that certain something - look no further. You have found it!

## ENTRANCE AREA | CLOAKROOM

**UV DIGITAL PRINTING  
GUARANTEES BRILLIANT  
COLORS WITH HIGH  
SATURATION.**

Come home, relax, unwind. Why not start right there in the foyer? Front-hanging, integrated or suspended from the ceiling - our tension fabric frames are a great way of adding that special touch to your cloakroom area. Even dark hallways get to shine in new colors thanks to our illuminated frames. And if you want, you can even customize them to match the season as the fabrics can be exchanged over and over again.

## LIVING ROOM

---

The living room is a multipurpose room and offers space for all kinds of activities. To make everyone feel comfortable at all times, it is especially important to adapt the lighting mood to the given situation. This is where our dimmable light frames can shine: The light output can be conveniently controlled by remote control - as an additional light source or dimmed as mood lighting while watching TV. Our tension fabric frames are also a real eye-catcher when used as a ceiling light or as an unlit design element.

**LEDS LAST 25 TIMES LONGER  
AND USE UP TO 90 % LESS  
ENERGY THAN LIGHT BULBS.**

## DINING AREA

---

The dining area is not only a place for delicious food, but also for socializing from morning to night. How about dinner with a view of the New York skyline, or a game night at a perfectly lit table with overhead lighting? Find out with our tension fabric frames that make it easy to change and adapt the ambiance of your room - all without having to pick up a paint brush.

## KITCHEN

Take the cooking spoon to prepare your meals and be inspired to create new recipes. Boost your creativity by enhancing your kitchen with select fabric graphics. Use our special fabric for artistic textures and added depth by creating arcs of light that visually enhance the space. For more flexibility, the RGB LEDs can be adjusted to any color by remote control.

## BEDROOM

---

Rest, relax, recharge. In order to design your bedroom in a way that invites you to do so, choose colors with a calming effect. With their neutral color rendering, our high-quality LEDs guarantee that the motifs, both lit and unlit, will perfectly meet your expectations.

**GREEN HAS A CALMING EFFECT.  
RED IS SAID TO WHET THE  
APPETITE. ORANGE HAS A  
STIMULATING EFFECT.**

## BATHROOM | SANITARY

Switch off and dive into another world. With our tension fabric frames, you can do that in your bathroom. Increase the relaxation factor with light frames as an additional light source in bathrooms without daylight or with tension fabric frames as large-scale wall coverings. Or go island hopping in just a few minutes by simply changing our fabric graphics.

## FITNESS

---

A 10 km jog by a cool, refreshing mountain lake or a complete muscle building workout with sea view and beach feeling? No problem with our tensioning fabric frames. The XXL frames can replace an entire window and are therefore ideal for training areas with little or no daylight. The result: Training sessions with state-of-the-art equipment in a setting that almost feels like nature. A very special kind of workout experience.

**IT HAS BEEN PROVEN THAT  
LIGHT CAN HAVE A POSITIVE  
EFFECT ON PSYCHE AND  
PERFORMANCE.**

## WORKSPACE

Your home may not be perfectly designed for a workplace. To shield individual areas from each other, our tension fabric frames can be used as freestanding partition walls or for complete room solutions with acoustic fabric. The room divider shields the living area and also provides more privacy during video conferences. Less distraction, more focused work.

## OUTDOOR AREA | GARAGE

Outdoors, our tension fabric frames not only protect you from prying eyes, but also from winds. A special flag fabric ensures that the sunlight is not completely blocked and creates pleasant light conditions. This makes your outdoor area, both balcony and terrace, your personal oasis of well-being. Our tip: If you have a dark garage, you can give it a completely new sense of space with one of our large-scale illuminated frames.

# 120 MM

**M 1901** fabric tension extrusion for light frames 120 mm  
9.77 kg | 6000 mm

**M 1915** fabric tension extrusion for light frames 120 mm  
11.90 kg | 6000 mm

**U 1060** fabric tension extrusion for light frames with multiple layers of fabric 120 mm  
16.20 kg | 6000 mm

### 80 MM

**M 1935** fabric tension extrusion for light frames 80 mm  
9.58 kg | 6000 mm

### 40 MM

3.41 kg | 6000 mm

**M 1970** fabric tension extrusion for light frames 40 mm  
4.34 kg | 6000 mm

### 40 MM

**M 1307** fabric tension extrusion for double-sided fabric attachment 40 mm  
5.39 kg | 6000 mm

### 28 MM

**M 1614** fabric tension extrusion 28 mm  
1.54 kg | 6000 mm

### 22.5 MM

**M 1309** fabric tension extrusion for small formats up to 841 × 1189 mm (DIN A0), 22.5 mm  
2.53 kg | 6000 mm

### 16 MM

**M 1607** fabric tension extrusion for small formats up to 594 × 841 mm (DIN A1), 16 mm  
1.91 kg | 6000 mm

# MAKING UP FABRICS

## Guide

### GENERAL INFORMATION

This guide is intended to help you order your fabric prints. There may be deviations depending on which service provider you buy your fabric prints from, We are happy to help if you have any questions.

### MADE-UP FABRIC – FLAT WELT

Our tension fabric extrusions come with a groove for flat welts. This ensures easy installation, a secure hold and perfect fabric tension.

made-up fabric,  
flat welt 12 mm

### FABRIC SIZE = OUTER SIZE OF FRAME

Usually, the outer size of the frame is given as the fabric size. Since the stretching behavior of each fabric varies, the fabric size should however be clarified directly with your provider.

### IMAGE RESOLUTION

The image resolution should match the future fabric size. Ideally, it should be 300 dpi. For larger formats, however, a lower dpi number may be sufficient due to a higher viewing distance.  
(see table as a guide)

FILE SIZE	PRINT RESOLUTION
up to A3	300 dpi
up to A2	200 dpi
A1 - A0	150 dpi
10 m <sup>2</sup>	72 - 100 dpi
25 m <sup>2</sup>	50 - 75 dpi
50 m <sup>2</sup>	30 - 50 dpi
more than 50 m <sup>2</sup>	20 - 30 dpi

### TRIM ALLOWANCE

Please create your file with surrounding trim to ensure that the main subject is not cropped.
